NexaWorks — Supplier Proposal

Executive Summary

NexaWorks provides a balanced programme combining configurable integrations, controlled delivery, and a high-touch support model.

Proposed Solution

The proposed modular platform integrates through REST APIs and approved middleware. Capacity testing, role design, and a solution prototype are completed before configuration is scaled.

Implementation Plan, Team, and Milestones

A 14-week delivery has named milestones: discovery (2 weeks), prototype (3), configuration (5), test and training (3), and go-live (1). The risk register has owners, triggers, and mitigations. The team includes a programme manager, architect, integration lead, security analyst, trainer, and four engineers.

Commercial Proposal

Item	Amount
Implementation	$285,000
Annual support	$72,000
Assumption	Up to six external integrations

Security, Compliance, and Risk Controls

NexaWorks provides SSO, MFA, encryption in transit and at rest, immutable audit records, annual penetration tests, privacy impact assessment support, and SOC 2 Type II controls.

Support, Experience, and References

A named customer success manager, 24/7 critical support, monthly adoption reviews, knowledge transfer, and four relevant references are included.
