Orbit Digital — Supplier Proposal

Executive Summary

Orbit Digital brings extensive public-sector delivery experience and a proven managed-service approach.

Proposed Solution

Orbit will configure its established platform and work with the client to determine how existing systems connect. Integration patterns will be agreed after contract award.

Implementation Plan, Team, and Milestones

The 16-week approach includes mobilisation, configuration, testing, training, and launch. A delivery director, project manager, and implementation team are proposed.

Commercial Proposal

Item	Amount
Implementation	$260,000
Annual support	$68,000
Assumption	Integration scope agreed during mobilisation

Security, Compliance, and Risk Controls

The service has encryption, role-based access, security monitoring, backup testing, and an ISO 27001-aligned information-security programme.

Support, Experience, and References

Orbit offers 24/7 critical support, a service desk, quarterly reviews, and six references from comparable large organisations.
